

THE LISTING IMAGE CHECKLIST

Seven images in the order a buyer needs them, for Flipkart, Amazon, Blinkit, Zepto and your own store. Check each marketplace's current size and background rules before you upload.

THE SEVEN IMAGES

- ☐ Hero: pack front, clean white ground, fills the frame
- ☐ Scale: in hand or beside a familiar object
- ☐ One benefit: a single line, six words or fewer
- ☐ What is inside: three or four facts as a graphic
- ☐ In use: one real setting that fits your buyer
- ☐ Proof: only claims you can back, as badges
- ☐ The range: other variants, same layout

BEFORE YOU UPLOAD

- ☐ Hero still reads at 100 pixels wide
- ☐ Text on images is large enough for a phone
- ☐ Same background, light and angle across the whole range
- ☐ Square versions exported, highest resolution the marketplace allows
- ☐ A short looping film ready for the video slot, if the marketplace has one

THE FAST WAY

Build one set as a template. Every new flavour or colour then takes a day, not a shoot. That is a visual system, and it is what we build.
