

THE PRODUCT PAGE FILM CHECKLIST

Where motion goes on a product page, and how to add it without slowing the page down.

THE MAIN LOOP

- ☐ Six to ten seconds, seamless loop
- ☐ Plays muted, no play button, works with sound off
- ☐ Shows scale and use in the first three seconds
- ☐ Any text is large enough for a phone

KEEP IT FAST

- ☐ A still poster frame shows first
- ☐ The film loads after the page, not before
- ☐ File kept to a few megabytes
- ☐ Vertical or square on mobile, not a tiny wide strip

AROUND IT

- ☐ Three stills kept for the careful buyer
- ☐ A three-second loop beside each big claim
- ☐ The same look as your ads, so the click feels continuous

MEASURE

- ☐ Change one product page first
- ☐ Compare add-to-cart for two weeks before and after
- ☐ Roll out only if it moves

WHY A LOOP

It is the only media on the page that moves without being asked. Nobody has to tap it, swipe it or choose it.
