CLAUDE SKILLS THAT KILL AI SLOP

PICANTE.

A skill is a saved set of instructions Claude loads for a job. All of these are free on skills.sh. Install any of them with one line: `npx skills add owner/repo`

UI/UX PRO MAX

What it does	Layout, type, colour and accessibility rules Claude checks while it builds. We used it on our own site. 19 skills in the pack.
Install	<code>npx skills add nextlevelbuilder/ui-ux-pro-max-skill</code>

IMPECCABLE

What it does	Polish and critique passes for interfaces that came out of AI looking unfinished. 24 skills, including polish and critique.
Install	<code>npx skills add pbakaus/impeccable</code>

TASTE SKILL

What it does	Pushes Claude toward high-end visual decisions and away from the generic default look. 15 skills, including redesign-existing-projects.
Install	<code>npx skills add Leonxlnx/taste-skill</code>

STOPSLOP

What it does	Cuts filler and generic phrasing out of what Claude writes. One skill. Does one thing.
Install	<code>npx skills add hardikpandya/stop-slop</code>

HUMANIZER

What it does	Rewrites AI-sounding copy so it reads like a person wrote it. One skill. Pair it with Stop Slop.
Install	<code>npx skills add blader/humanizer</code>

FRONTEND SLIDES

What it does	Builds presentations as code: custom layouts, real type, no template look. For decks that do not look like decks.
Install	<code>npx skills add zarazhangrui/frontend-slides</code>

DIAGRAM DESIGN

What it does	Clearer diagrams for workflows, systems and processes.
Install	<code>npx skills add cathrynlavery/diagram-design</code>

ALSO WORTH A LOOK

Egonex-AI/Understand-Anything	Turns documents, research and concepts into plain explanations. Nine skills.
google-labs-code/design.md	Four skills from Google Labs for design-led code.

THE TWO WE HAVE USED OURSELVES

UI/UX Pro Max, and the frontend-design skill that ships with Claude. We built thepicantestudio.com with both.
