

THE MODERN WEB STACK

The five tools behind sites like Lando Norris's, read from the site's own code in September 2026. That site was built by the studio OFF+BRAND. We are not affiliated with either.

WEBFLOW webflow.com

What it is	Visual site builder, CMS and hosting.
Use it when	When the client needs to edit content themselves.
Learn it from	Webflow University, free.

LENIS lenis.darkroom.engineering

What it is	Smooth scroll library, a few kilobytes.
Use it when	Any marketing site where feel matters. Skip it on apps and long documents.
Learn it from	The README. It is ten lines.

GSAP+ SCROLLTRIGGER gsap.com

What it is	Animation engine and its scroll plugin.
Use it when	Reveals, pinned sections, parallax, timelines tied to scroll.
Learn it from	GSAP docs and their free learning centre.

RIVE rive.app

What it is	Interactive vector animation with state machines.
Use it when	Icons, mascots and transitions that react to input and stay tiny.
Learn it from	Rive's own tutorials.

THREE.JS threejs.org

What it is	WebGL 3D in the browser.
Use it when	A real 3D object or shader. Expensive to build, so use it once, where it counts.
Learn it from	threejs.org examples, then Three.js Journey.

LEARN IN THIS ORDER

Lenis, then one GSAP ScrollTrigger, then Rive, then three.js. The first two give most of the feel for a fraction of the work. Always respect reduced-motion settings and test on a mid-range phone.
